Passivation of ferrous materials in salts of phosphonic acids Veres *et al.* 147
Chelant enhanced passivation of carbon steel Joshi *et al.* 200
Inhibition of carbon and low alloy steels in hot HCl Trabanelli *et al.* 213
Monitoring and mathematical fitting of atmospheric corrosion data for carbon steel Porro *et al.* 231
Electrochemical impedance spectroscopy of deformed mild steel Rangel *et al.* 237
Corrosion of mild steel in $NaNO_3$ Singh and Sen 299
Corrosion of steel in EDTA Palmer and Boden 305
Stainless steels
Localised corrosion of welds of austenitic stainless steel in sea water Shalaby and Hussain 45
Performance of 304L with exposed end grain in intergranular corrosion tests Kain *et al.* 59

Corrosion of fertiliser plant steam circuit Verma *et al.* 66
Polarisation measurements in thin phase layers of electrolytes Basman and Freiman 119
Passivation of stainless steels in thin phase layers and in bulk of acid sulphate solutions Basman *et al.* 121
Coupling of 316L steel with Ti, Nb, and Ta in Ringer's solution Gluszek and Masalski 135
Influence of σ phase on general and pitting corrosion of SAF 2205 duplex stainless steel Potgieter 219
Effect of cooling rate on corrosion of 3CR12 van Bennekom and Robinson 224
Retention of passivity by 430 stainless steel in dilute sulphuric acid Basman and Adeloju 290
SCC of reactor riser by polythionic acid Verma *et al.* 315
Discussion on Influence of σ phase on general and pitting corrosion of SAF 2205 duplex stainless steel by Potgieter Francis 319

Stress corrosion cracking
Review of corrosion studies on Al metal matrix composites Turnbull 27
SCC of 2091 Al–Li alloy in sulphate and chloride solutions Marsac *et al.* 50
Performance of 304L with exposed end grain in intergranular corrosion tests Kain *et al.* 59
Corrosion of fertiliser plant steam circuit Verma *et al.* 66
Test methods for environment assisted cracking Turnbull 271
SCC of reactor riser by polythionic acid Verma *et al.* 315

Sulphidation
High temperature oxidation and sulphidation and their prevention by ceramic coatings Gellings 105

Superalloys
High temperature oxidation and sulphidation and their prevention by ceramic coatings Gellings 105

Surface chemistry
Oxidising type inhibitors for Al and steel in NaCl solutions Bairamov and Verdiev 128

Surfactants
Flow induced corrosion Weber 193

Tantalum
Coupling of 316L steel with Ti, Nb, and Ta in Ringer's solution Gluszek and Masalski 135

Test methods
Test methods for environment assisted cracking Turnbull 271

Tin
Influence of Sn addition on corrosion resistance of Al ion platings Abu Zeid 144

Titanium and titanium alloys
Coupling of 316L steel with Ti, Nb, and Ta in Ringer's solution Gluszek and Masalski 135

Uranium enrichment
Corrosion of copper alloys by gaseous uranium hexafluoride Vorster and Robinson 151

Weld metal
Localised corrosion of welds of austenitic stainless steel in sea water Shalaby and Hussain 45

Zinc and zinc alloys
Zinc and polyphosphates as corrosion inhibitors for zinc Rangel *et al.* 207
